PROJECTS

Pet Adoption System

It is a web-based application that helps connect pets, adopters, and rescuers on a single platform. It allows users to view available pets, request adoption, and manage pet details easily. The system helps promote safe and organized pet adoption while reducing the number of stray animals.

Gym Management System

It is a web-based application used to manage gym members, trainers, and memberships efficiently. It helps the admin store member details, track payments, and manage workout schedules. The system reduces manual work and makes gym management faster and more organized.

Student Attendance Management System

It is an application used to record and manage students' attendance digitally. It allows teachers to mark attendance, store records, and generate attendance reports easily. The system reduces manual work and helps maintain accurate attendance data.

Expense Tracker System

It is an application used to record and manage daily income and expenses. It helps users track their spending, categorize expenses, and view financial reports easily. The system helps in better budgeting and managing personal finances efficiently.
